The Coral light casts dramatic shadows when there is less ambient light.

Coral 1000, 1200 and 1600 hang from a stainless steel suspension wire.

One top piece on the Coral light is attached with nuts & bolts (instead of rivets), so that the piece can swing open for relamping.

Unlike the smaller sizes of the Coral light, the Coral 1600 is assembled with aluminum rivets, and is shipped pre-assembled (not available as a kitset).
