

# Peggy armchair

1

Gio Tiroto

2024

With its curvy, enveloping design, this chair conveys a sense of security and cosiness, while breaking away from its historical context to become an iconic piece defined by its pure contours.

"Peggy is an armchair that we feel we know," comments Gio Tiroto, "but have never encountered."

The back makes it both light and dynamic, as well as soft and comfortable.

## Structure

The structure is made of tubular steel, a seat with a belted frame and (recycled) polyurethane foam. The armchair consists of just two parts: a base-back and a seat, held together by a fastening system that makes it possible to disassemble.

Available in a fixed version or with a 360° swivel base, equipped with a return mechanism.

## Upholstery

The fabric wraps around the entire product and is tailored to enhance its shape. The upholstery is not removable.
